

*“We’re serious about your eyes”*

Eyes are one of our most sensitive organs and when things go wrong you need to know you are in the care of an experienced optometrist. John Davies and Wayne Derrick are fully qualified to provide not only standard eye tests but also treatment for cataracts, glaucoma, macular degeneration, diabetes, colour vision and other eye disorders. They also have experience in foreign body removal and eye infections. With the arrival of a retinal camera to the practice, John and Wayne are able to monitor glaucoma, macular degeneration and diabetes more closely than before.

John Davies Optometrists also offers a wide range of frames including Wayne Cooper, Trent Nathan and Celine Dion as well as spectacle repairs and maintenance. Spectacles can also be arranged under the Veterans Affairs program for Veteran Affairs card holders as well as the Queensland Government Spectacle Supply Scheme for pensioners, health care and Queensland senior card holders. Package deals are also available for pensioners and health care card holders who want that something different.

For peace of mind when it comes to your vision, come in and see the friendly staff at John Davies Optometrists today.
